Operational Plan No.	Technologies for Sustainable Rural Development
Name of the Course	RD-6
Introduction and Objectives of the Course	Technologies are the driving force of development and various technologies have been developed and transferred for the development of rural area. There is lot of advancement in the field of infrastructure development, agriculture, horticulture, marketing facilities and health and education facilities and transportation. But there are many areas which are left out like housing, sanitation, health, chemical free food production, health and education. The main objective of this programme would be to train the technical teachers so that they can contribute towards sustainable development through technological interventions.
Course Content	<ul style="list-style-type: none"> ▪ Transfer of Technology ▪ Integrated Village Development ▪ Watershed Management ▪ Rain-water Harvesting ▪ Low Cost Housing and Green Building ▪ Low Cost Sanitation Technology ▪ Biogas and Solar Technology ▪ Composting and Organic Farming
